

I'm not robot

I am not robot!

We support a wide variety of industries with our products. In the North American region, TOYO carries a full line of horizontal and vertical electric injection molding machines ranging from 10 to 100 tons, serving all sectors including medical and automotive. A Full Lineup and Variations of the Industry's Top Electric Vertical Injection Molding Machines, Ranging from 10 to 100 Tons in Clamping Force. PAT Easy Operation. The Si-series offers a wide selection of injection units for your specific molding needs. ET-V series (Vertical Clamping Vertical Injection Single station) Composition of a standard hoop molding system. Applied case: High speed hoop molding of super thin-wall LED reflector. Injection system. Injection force (with) Low injection speed. High injection speed. Injection position. Clamping force. Tie bar distance (H x W). Die stroke (Max/Min.) Die thickness. Ejection force. Machine dimensions (L x W x H) x () Multi Injection System. BDV7EX x x. The Si-6S series provides a Missing: pdf. We are a precision machine maker, developing and manufacturing plastics injection molding machines, optical disc molding machines and die-casting machines. Fully Electric Injection Molding Machine, Si-6S Series. Product Information. Specifications. A Full Lineup and Variations of the Industry's Top Electric Vertical Injection Molding Machines, Ranging from 10 to 100 Tons in Clamping Force. PAT Easy Operation. Products Technology. We are a precision machine maker, developing and manufacturing plastics injection molding machines, optical disc molding machines and die-casting. Missing: pdf. In the North American region, TOYO carries a full line of horizontal and vertical electric injection molding machines ranging from 10 to 100 tons, serving all. Missing: pdf. Created Date: 3/1/PM. TOYO H-Series Injection Molding machine. Free download as PDF File.pdf) or read online for free. Fully Electric Vertical type Injection Molding Machine USA Version. URL. For safe use of the machine, please read the respective manual carefully. Based on TOYO's accumulated molding expertise and technical know-how, small models in Si-series offer strengthened base performance for value-up of customer's products. Si. TOYO MACHINERY & METAL CO., LTD. The proven twin nozzle-touch rods structure secures high molding quality. Proven. Created Date: 3/1/PM. TOYO H-Series Injection Molding machine. Free download as PDF File.pdf) or read online for free. TOYO's ET series facilitates automation and systematization of the molding processes with its mechanical structure that is suited to hoop and insert molding.
