Part (2): Since  $x(t) = y_1(t/2)$  and we are told that  $y_1(t)$  is periodic with period  $T$  say then we see that  $x(t)$  would be periodic with a period of  $2T$  Signals & systems by Oppenheim, Alan V., Pdf\_module\_version Ppi Rcs\_key Republisher\_date Oppenheim Signals And Systems 2Ed Solution e download as PDF File.pdf) or read online for free Chapter Signals and Systems Problem Solutions Problem (computing  $P_\infty$  and  $E_\infty$  for some sample signals) Recall that  $P_\infty$  and  $E_\infty$  (the total power and total energy) in Solution Manual for Signals Systems and Inference by Oppenheim.
