

I'm not robot

**I am not robot!**

I'm Greg, an installation specialist, year Windows MVP, and Volunteer Moderator here to help you. It should This video shows how to scan multiple documents as a single PDF file using Brother DSDW Scanner and your windows Laptop This will allow scanning from the printer top to the PC, placing the scanned files into the folder you set in Scan Settings. The scan settings dialog Hi Istvan. Install the full software package for your exact model printer from the Brother Support Downloads site. Place your document, face down, top edge first in the ADF. Click the SCAN tab, and then select the type of scan you require (Image, E-mail, or File).
