**I am not robot!**

Note: An entry in the table is the area under the curve to the left of  $z$ ,  $P(Z \leq z)$ . Score Table chart value corresponds to area below  $z$  score. The file contains a table with columns for  $z$  values and rows for probabilities, from  $z = -3$  to  $z = 3$ . Table entry for  $z$  is the area under the standard normal curve to the left of  $z$ . The table value for  $Z$  is the value of the cumulative normal distribution.  $Z$  is the standard normal random variable.  $z$  Standard Normal Distribution Table (Right-Tail Probabilities)  $z$  Microsoft WordSTU Z STANDARD NORMAL DISTRIBUTION: Table Values Represent AREA to the LEFT of the Z score Standard Normal Distribution Tables STANDARD NORMAL DISTRIBUTION: Table Values Represent AREA to the LEFT of the Z score Table III Standard Normal Distribution Cumulative Probabilities Let  $Z$  be a standard normal random variable:  $\mu = 0$  and  $\sigma = 1$ . This table contains cumulative probabilities:  $P(Z \leq z)$ . A Statistical Tables Standard Normal Z Distribution Probabilities  $-3$   $-2$   $-Z$  Lower-tail probability:  $P(Z \leq z)$  Standard Normal Probabilities.  $z$  Standard Normal Cumulative Probability Table  $z$  Cumulative probabilities for NEGATIVE  $z$ -values are shown in the following table:  $z$  A PDF document that shows the area to the left of the Z score for different values of  $Z$ . The table covers the range from  $Z = -3$  to  $Z = 3$ , with  $z$  values in decimal places and percentages Standard Normal Distribution Tables STANDARD NORMAL DISTRIBUTION: Table Values Represent AREA to the LEFT of the Z score Tables Appendix T Table III Standard Normal Distribution Cumulative Probabilities Let  $Z$  be a standard normal random variable:  $\mu = 0$  and  $\sigma = 1$ . This table contains cumulative probabilities:  $P(Z \leq z)$ . A PDF file that shows the probabilities of the standard normal  $z$  distribution for different  $z$  values.  $z$  is the area under the standard normal curve. Table entry. For example, the value for  $z = 1.25$  is  $0.8944$ . Standard Normal Distribution Table (Right-Tail Probabilities)  $z$  Standard Normal Table.  $z$  to the left of. Table entry for.  $z$   $z$  Standard Normal Table.
