A combined stainless steel domestic hot water tank of or L and heat pump for easy installation A Missing: fiche technique › Label A+++ : COP chauffage 5,1(2) (pour la taille 4) et COP ECS 3,3(3) › Technologie Inverter: adaptation du fonctionnement de la pompe à chaleur aux besoins réels pour The Daikin AlthermaH HT compressor is able to deliver a high leaving water temperature of°C on its own, while the Daikin AlthermaH MT available in classes delivers up to°C leaving water temperature. Integrated DHW stainless steel tank model This model is a compact unit with a small footprint of xmm. Floor standing air to water heat pump for heating, cooling and hot water; ideal for low energy houses. This single fan outdoor unit achieves some of the highest efficiencies and Missing: fiche technique Daikin AlthermaH MT F+W 4P –General information About this document Thank you for purchasing this product. Compared to other heating systems, this range uses outdoor air to deliver the correct capacity of heat and hot water, even in temperatures as low as°C Quick guide for basic usage. Format: Digital files on product-information/ La gamme Daikin AlthermaH HT est la solution adaptée pour couvrir vos besoins en chauffage, en rafraîchissement et pour la production d'eau chaude sanitaire. Format: Paper (in the box of the indoor unit) User reference guide: Detailed step-by-step instructions and background information for basic and advanced usage. The Daikin AlthermaH HT range can be combined with three different indoor units to connect to the outdoor unit, offering specific features to ensure heating, cooling and Missing: fiche technique La gamme Daikin AlthermaH HT est la solution adaptée pour couvrir vos besoins en chauffage, en rafraîchissement et pour la production d'eau chaude sanitaire. L'unité extérieure extrait l'énergie thermique présente dans l'air extérieure et fait monter sa température jusqu'à un niveau suffisant pour assurer le chauffage. Floor standing air to water heat pump for heating, cooling and hot water; ideal for low energy houses. Informations complémentaires sur le produit Daikin Althermalow temperature split integrated floor standing unit. S'intégrant dans les écosystèmes de maisons connectées, vous contrôlez ainsi Daikin Altherma utilise une source naturelle d'énergie. Impressive performance The Daikin AlthermaH HT range can be combined with three different indoor units to connect to the outdoor unit, offering specific features to ensure heating, cooling and domestic hot water in your home. Please: Read the documentation Table of contents About this document User safety instructions General Instructions for Daikin AlthermaH HT & MT. Unité extérieure Unité intérieure Documentation Spécifique à la combinaison Documentation. The unit The Daikin AlthermaH MT is a renewable heating solution that performs just as well in the colder climates as it does in warm. S'intégrant The new Daikin AlthermaH HT E-Series is designed to perform reliably, whatever the weather. Cette chaleur est acheminée jusqu'à l'unité intérieure via des tuyaux Daikin Althermalow temperature split integrated floor standing unit.
