a DIN WELDED CIRCULAR AUSTENITIC STAINLESS STEEL TUBES SUBJECT TO SPECIAL REQUIREMENTS

Field of application: This standard applies to welded circular tubes and pipes (hereinafter briefly referred to as tubes) subject to special requirements and made from the austenitic stainless steels listed in table 1. 2) A "g" is to be appended to the symbol for the type of condition of tubes having smoothed welds. Conditions k1, k2, k3, or are usually used as the starting condition. The order shall specify whether grinding or polishing is to be internal or external, or internal and external. Inform now!
