

I'm not robot

**I am not robot!**

The QFT builds the skill of asking questions and presents students with a prompt to stimulate student questions. If so, rework your questions and add them to the bottom of your list. This could be a statement, a quote, a photo, a scientific phenomenon, a video clip, a historical event, or a current event. The Question Focus, or QFocus, is a prompt that can be presented in the form of a statement or a visual or aural aid to focus and attract student attention and quickly stimulate the formation of questions. This technique also encourages creativity, problem-solving, and reflection. Steps of the Question Formulation Technique (QFT) A practical application to help you brainstorm learning questions Step 1: Design a Question Focus (QFocus) The QFocus is a stimulus for jumpstarting the generation of Step 2: Teachers Design a Question Focus. Write down every question exactly. The Question Focus, or QFocus, is a prompt that can be presented Question Formulation Technique (QFT), a simple, but rigorous, step-by-step process designed to help students produce questions, improve the questions, and then plan how to answer them. The Question Formulation Technique (QFT) was developed through work with parents in a low-income community. It distills sophisticated question-asking into a simple, accessible, and reproducible technique. An Overview of the Question Formulation Technique™ (QFT™) Step 1: Teachers Design a Question Focus. Once students have learned how to use it, they can apply it to their work in other settings. The Question Formulation Technique (QFT) is a step-by-step process that allows all people to produce their own questions, work with different types of questions, and strategize on how to use their questions. Students create questions without judgment and without considering possible answers until the question formulation process is complete (see steps below). Goal: A list of questions, or anything else tied to an intended learning goal. We call this prompt a Question Focus, or QFocus for use in groups to generate as many questions as possible. Add this new question to the bottom of your list of questions. Step 2: Analyze/Discuss, Judge or Answer the Questions. Dan Rothstein and Luz Santana, co-directors of the Right Question Institute, the Question Formulation Technique (QFT) is a simple but rigorous step-by-step process created by the Right Question Institute to help all people — students and adults — Six steps. Step 1: Prioritize Choose three priority questions you are most interested in using to guide a research project. Your Own Questions Ask as many questions as you can. Do. The Question Focus, or QFocus, is a prompt that can be presented in the form of a statement or a visual or aural aid to focus and attract student attention and quickly stimulate the formation of questions. The Question Formulation Technique (QFT) is a simple step-by-step, rigorous process that facilitates the asking of many questions. It distills sophisticated forms of divergent, convergent, and metacognitive thinking into a deceptively simple, accessible, and reproducible technique. Step 2: Investigate your questions as investigable or non-investigable: Investigable questions meet the following criteria you think of it. CHALLENGE YOUR QUESTIONS. The QFocus is different from many traditional prompts because it is not a teacher's question. Developed by the Right Question Institute, the Question Formulation Technique, or QFT, is a structured method for generating and improving questions. This guide helps you, the facilitator, lead an individual participant or a group of participants through the process. The Question Formulation Technique (QFT) was created by RQI. Visit [www.rightquestioninstitute.org](http://www.rightquestioninstitute.org) for more information and free resources. The process includes the following steps. The Question Formulation Technique (QFT) Planning Tool can be used to guide your thinking as you plan to use the QFT. The QFT Planning Tool will help to identify teaching goals and design questions. Developed by the Right Question Institute, the Question Formulation Technique, or QFT, is a structured method for generating and improving questions. Rework questions Do you have questions that you would like to rework? Step 1: Teacher, facilitator or research writer designs a question focus.
