When one defines "order" as a sorting of priorities, it becomes beautifully clear as to what Foucault is doing here. Order is, at one and the same time, that which is given in things as their inner law, the hidden network that determines the way they confront one another, and also that which has no existence except in the grid created by a glance, an examination, a language; and it is only in the blank spaces of this grid that order This extreme, partial, scarcely indicated window frees a whole flow of daylight which serves as the common locus of the representation.
