

I'm not robot

I am not robot!

Each project defines a default team, which you can start using immediately. With Azure Functions, you can write the code you need for a solution without worrying about building a full application or the infrastructure to run it. As you prepare to bring DevOps into your business, you'll likely encounter differences from your current approach to software delivery. If you have several development or feature teams, we recommend that you define a team in Azure DevOps for each feature team.

[Azure IoT Edge](#) [Azure Digital Twins](#) [Azure Sphere](#) [Obtener más información acerca de Azure IoT](#) [Qué utilizar y cuándo/ Capítulo](#) [Compartir código](#), controlar el trabajo y enviar el software ¿Cómo puede ayudarte Azure a planificar de forma más sensata, colaborar mejor y enviar tus aplicaciones más rápido?
