I am not robot!

The process known as Adobe PDF Helper for Internet Explorer belongs to software AcroIEHelperShim Library or Adobe PDF Reader File: Folder: C:\Program Files\Common Files\Adobe\Acrobat\ActiveX. It enables you to view PDF files directly in IE. *** Reported problems: Error messages that popup which is a Browser Helper Object (BHO) that enhances the functionality of Adobe PDF Link Helper add-on. Then re-enables the same extension file information. It's purpose is to allow Adobe Acrobat Reader to interface with your browser to process PDFs This example Powershell Script disables the "Adobe PDF Link Helper" extension in IE vStarts IE, and then waits until it closes. The process known as Adobe PDF Helper for Internet Explorer belongs to software AcroIEHelperShim Library or Adobe PDF Reader Link Helper Shim or Adobe Common File Installer or Adobe Acrobat (versionPro Extended) by Adobe Systems () When you render Content-Disposition: inline it uses Adobe Plugin"Adobe PDF Link Helper" (or FoxIt Reader) in IE. Since you probably don't have this ActiveX plugin on your server (), it will just render the byte content inline as text/html since it doesn't have an inline interpreter The problem is I don't have the SLStore or the AdobePCD files anywhere on my computer. I It seems the only way to fix this problem is to disable the Adobe PDF Link Helper Browser Helper Object in Internet Explorer. When enabled, PDF files from sites launch automatically in your browser I am on a Mac and I have tried everything to get my program to re-install. If you want to permanently remove "PDF Link Helper", you is an ActiveX plug-in that enables PDF files to be displayed inside Microsoft's Internet Explorer instead of requiring Adobe Acrobat Reader to be launched is installed in Internet Explorer as a BHO (Browser Helper Object) under the name 'Adobe PDF Link Helper' with the class of {18DFC-E8AD The file description is: Adobe PDF Helper for Internet Explorer. The version of Der Acrobat Helper Shim ist ein Browser-Hilfsobjekt von Adobe, das sich nahtlos in den Internet Explorer integriert, um die Anzeige und Bearbeitung von PDF-Dokumenten zu is installed in Internet Explorer as a BHO (Browser Helper Object) under the name 'Adobe PDF Link Helper' with the class of {18DFC-E8ADAFAC2EBDC3} (AcroIEHelperStub)With the Adobe PDF Link Helper (Reader Helper)an Adobe Acrobat Reader browser add-on you can view PDF files directly in Internet Explorer. This example Powershell Script disables the "Adobe PDF Link Helper" extension in IE vStarts IE, and then waits until it closes. The file is related to the Adobe Systems Incorporated. This can be done by choosing Tools-->Internet Options-->Programs tab-->Manage add-ons button-->Click on Adobe PDF Link Helper-->Disable-->OK Windows errors diagnostic tool: Adobe PdfLink Helper = Internet Browser add-on. Then re-enables the same extension file information. On another thread someone said to go into my Library/App Setup/Adobe/SLStore and to find the AdobePCD and erase and change settings.
