The Stranger by French author and philosopher Albert Camus, published in 1942 as *L'Étranger*, is a seminal work that delves into the philosophy of existentialism and the absurd. It is the first novel in Camus's tetralogy, which he later called the "cycle of the absurd." The young Camus was drawn all the closer to his mother who brought him up in the working-class Algiers district of Belcourt where she earned her living cleaning houses. In the story of an ordinary man who unwittingly gets drawn into a senseless murder on a sun-drenched Algerian beach, Camus was exploring what he termed "the nakedness of existence." The novel is a masterpiece of minimalist prose, capturing the essence of a man's inner world and his relationship with the world around him.
