In its more severe forms, the Adonis Complex poses a health threat that is as insidious and deadly as eating disorders are for women and girls. Today boys and men are bombarded by media imagery that promotes a specific ideal body for them to aspire to. Combining case studies with scientific research, this book reveals a threat that is as serious as the beauty myth for women or anorexia nervosa for girls Chapter gives a simple test to assess the presence of the Adonis complex. The dangers of anabolic steroids are described in chapter 5, fear of fitness in chapter 6, and other body obsessions such as hair, breasts, and genitals Contrary to popular belief, body image issues no longer affect females exclusively. These images include action figures, advertisements, music videos, and store catalogs.
