Cooperation occurs not only among individuals but also among collective entities, including firms, political parties, ethnic organizations, terrorist groups, and nation-states. The Declaration on the Right to Development provides an essential guide to the manner in which States, the international community and all organs of society must act and cooperate to ensure an enabling environment for development that is sustainable, just, equitable and inclusive. International cooperation means governments and institutions developing common standards and creating programs that take into account benefits and also problems that can potentially be extended to more than one society and even to all the international community.

Cooperation in the international system: An Overview of the State of the Debate. To this end, the paper presents a framework that draws on the concept of (global) public goods. Public goods are both goals and enablers of development at the domestic and global levels. International Cooperation considers these questions, identifies further areas for research, and pushes the analysis of this fundamental concept in international relations in new directions. Drawing on a distinction between domestic and global public goods as enablers and goals of development, the paper first illustrates the role of international cooperation and its interdependence. This definition of international cooperation is general in terms of both actors and issues. Cooperation occurs not only among individuals but also among collective entities. During the past decade much of the international relations literature about cooperation has adopted a distinct approach, which has tended to focus on the systemic level of Cooperation in the international system: An Overview of the State of the Debate.
