The Ziggurat Model includes four steps in designing a "The Ziggurat Model" is newly updated and expanded with the latest research and a new version of the Underlying Characteristics Checklist for Early Intervention (UCC) underlying deficits that can have a negative life impact. There are two versions of the UCC, one intended for use with individuals who are high functioning (UCC-HF), including those with Asperger Syndrome (AS), and one for use with those with a more classic The Ziggurat Model begins the process with an assessment of individual strengths and concerns related specifically to ASD and identifies interventions across five tiers that are matched to the individual's profile: (a) sensory and biological, (b) reinforcement, (c) structure and visual/tactile supports, (d) task demands, and (e) skills to teach Underlying Characteristics Checklist Classic Autism (UCC-CL). The UCC provides a snapshot of how ASD is expressed for an individual. It is assessment driven and provides a framework that guides parents, professionals, and autistics themselves in creating effective supports and strategies. Intended for individuals to adulthood who are significantly below average in cognitive functioning Author: Ruth Aspy, Barry G Grossman, ISBN Developed as a component of the Ziggurat Model, the Underlying Characteristics Checklist (UCC) is an informal, nonstandardized assessment tool designed to identify characteristics across a number of domains associated with ASD. It is not designed or intended for diagnosis of ASD The Ziggurat Model A Framework for Designing Comprehensive Strategies and Supports for Autistic Individuals Updated and expanded with the Underlying Characteristics Checklist for Early Intervention (UCC-EI) – backed by a comprehensive case study. The Ziggurat Model, for Underlying Characteristics Checklist Classic Autism (UCC-CL) Intended for individuals to adulthood who are significantly below average in cognitive functioning Interest Age+ The Underlying Characteristics Checklist The UCC is an informal assessment designed to identify ASD characteristics for the purpose of intervention. The Ziggurat Model, for individuals across the spectrum and across the life There are The Ziggurat Model is consistent with practices associated with PBIS, RTI and MTSS (Aspy and Grossman,). To that end, the Ziggurat Model includes two assessment tools – the Underlying Characteristics Checklist (UCC; High-Functioning and Classic) and the ABC-Iceberg. The focal point of the model is a five tiered research-centered system that capitalizes on strengths to address underlying needs. Underlying characteristics checklist manual including the individual strengths and skills inventory. Aspy, R., & Grossman, B.G. (). The Ziggurat Model is used in home, school, mental health The Underlying Characteristics Checklist The UCC is an informal assessment designed to identify ASD characteristics for the purpose of intervention. Assessing autism spectrum disorders Underlying Characteristics Checklist-High Functioning Pk. Developed as a component of the Ziggurat Model, the Underlying Characteristics Checklist (UCC) is an informal The Underlying Characteristics Checklist – Early Intervention (UCC) offers a comprehensive perspective as a basis for program planning for young children with ASD Updated and expanded with the Underlying Characteristics Checklist for Early Intervention (UCC-EI) – backed by a comprehensive case study.
