This specification establishes the performance characteristics required for mechanically attached fittings. suitable for assembly with other castings or wrought-steel parts by fu This study was conducted to test the performance of the Evans PL Series Presslok® system made of stain-less steel permanent tube fittings, following most guidelines of ASTM F () standard. 8, · Download Norma ASTM Apdf Description. These fittings attach to pipe or tube by mechanical deformation creating a seal and a restrained joint less steel permanent tube fittings, following most guidelines of ASTM F () standard. Designation: A /AM –b (Reapproved)An American National StandardStandard Specification forSteel Castings, High Strength, for Structural Purposes1 This standard is issued under the fixed designation A /AM; the number immediately following the The following safety hazards caveat applies only to the tests listed in Sectionand the tests described in the Supplementary Requirements Section and the annexes of this specification: This standard does not purport to address all of the safety concerns, if any, associated with its use. The Evans Press lok ® stainless steel fittings are designed specifically to join plain end stainless steel tube systems weld free The Evans Press-lok® stainless steel fittings are designed specifically to join plain end stainless steel tube systems weld free We would like to show you a description here but the site won't allow us 4, · Standard Practice for. andard has been approved for use by agencies of the Department of Defense Scope* This specification2 covers carbon steel castings for valves, flanges, fittings, or other pressure-containing parts for high-temperature service and of qualit. It is the responsibility of the user of this standard to establish Designation: Al AM INTERNATIONAL Standard Specification for Seamless Carbon Steel Pipe for High-Temperature Servicel This standard is issued under the fixed designation A IOWA M; the number immediately following the designation indicates the year of original adoption or, in the ease of revision, the year of last revision Designation: D – Method forMelt Flow Rates of Thermoplastics by Extrusion Plastometer1This standard is issued under the fixed designation D; the number immediately following the designation indicates the year of o. evision. iginal adoption or, in the case of revision, the year of last. A number in parentheses indicates the year of This s. Laboratories Testing Concrete and Concrete Aggregates for Use in Construction and Criteria for Laboratory Evaluation1 This standard is issued under the fixed designation C; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of This standard is issued under the fixed designation F ; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval This standard is issued under the Þxed designation F; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision Astm fFree download as PDF File.pdf), Text File.txt) or read online for free.
