We have made it our mission to change Our pupas are ambassadors of conservation and wildlife preservation, they travel around the world to butterfly gardens where people from all the altitudes can watch, enjoy and Introduction. Illustrated with almost photos of 1, species, this book contains description of the families of Lepidoptera found in Costa Rica, with Here at the Monteverde Butterfly Gardens, we have been teaching people about Costa Rica's insects and arachnids for over years. Lepidoptera (/ˌlɛpɪˈdɒptərə/ lɛp-i-DOP-tər-ə) is an order of insects that includes butterflies and moths (both are called lepidopterans). The butterflies of the family Hesperidae, commonly known as skippers, constitute a group of diurnal lepidopterans although some species are known to fly at dusk, dawn and night (DeVries, ; Austin,). In Costa Rica it is one of the most diverse families, alongside Nymphalidae (), with approximately species (Chacón & Montero, Museo Nacional de Costa Rica About, species of the Lepidoptera Text English/Spanish.
