I am not robot!

A list of all parts in the ISO series can be found on the ISO site. It is mainly concerned with *Staphylococcus aureus*, but also with *S. intermedius* and certain strains of *S. hyicus*. The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. ILNAS-EN ISO Every interested party, which is member of an organization based in Luxembourg, can participate for FREE in the development of Luxembourgish (ILNAS), European (CEN, CENELEC) and International (ISO, IEC) standards: Participate in the design of standards. Foresee future developments. Participate in technical committee. For the purposes of this part of ISO, the confirmation of typical and atypical colonies is based on a positive coagulase reaction, but it is recognized that some strains of *Staphylococcus aureus* give weakly positive coagulase reactions. ISO AMENDMENT Microbiology of food and animal feeding stuffs — Horizontal method for the enumeration of coagulase-positive staphylococci (*Staphylococcus aureus* and other species) —. Technique using AMENDMENT Inclusion ISO AMENDMENT Microbiology of food and animal feeding stuffs — Horizontal method for the enumeration of coagulase ISO (E) — results of the interlaboratory study (from ISO /Amd, Precision data) has been updated; — the Bibliography has been updated. Any feedback or questions on this document should be directed to the user's national standards body. This document specifies a horizontal method for the enumeration of coagulase-positive staphylococci by counting the colonies obtained on a solid medium (Baird-Parker ISO (en), Microbiology of the food chain — Horizontal method for the enumeration of coagulase-positive staphylococci (*Staphylococcus aureus* and other species) This document (EN ISO) has been prepared by Technical Committee ISO/TC "Food products" in collaboration with Technical Committee CEN/TC Microbiology of the food chain. Horizontal method for the enumeration of coagulase-positive staphylococci (*Staphylococcus aureus* and other species) Part Method This document specifies a horizontal method for the enumeration of coagulase-positive staphylococci by counting of colonies obtained on a solid medium (Baird-Parker ISO Microbiology of the food chain — Horizontal method for the enumeration of coagulase-positive staphylococci (*Staphylococcus aureus* and other species) — Part ISO Microbiology of the food chain — Horizontal method for the enumeration of coagulase-positive staphylococci (*Staphylococcus aureus* and other species) — INTERNATIONAL STANDARD. A Part Method using Baird-Parker agar medium AMENDMENT Microbiologie de la chaîne alimentaire — Méthode horizontale pour le dénombrement des staphylocoques à coagulase positive (*Staphylococcus aureus* et autres espèces) — Partie Méthode utilisant le milieu gélosé de Baird-Parker AMENDEMENT INTERNATIONAL STANDARD ISO Microbiology of the food chain — Horizontal method for the enumeration of coagulase-positive staphylococci (*Staphylococcus aureus* and other species) — Part Method using Baird-Parker agar medium This document, ISO and ISO describe three horizontal methods for the detection and enumeration of coagulase-positive staphylococci among which enterotoxinogenic strains are encountered.
