Four best friends, one music festival, and a cooler filled with human organs: this summer is about to get gory. Jennifer's Body fans will clamor for this new sapphic horror standalone from New York Times bestselling author Kayla Cottingham. Three years ago, the melting of arctic permafrost released a pathogen of unknown origin into the atmosphere, causing a small percentage of people to undergo a transformation that became known as the Hollowing. Those impacted slowly became intolerant to normal food and were only able to gain sustenance by consuming the flesh of other human beings. Those who went without flesh quickly became feral, turning on their friends and family. However, scientists were able to create a synthetic version of human meat that would satisfy the hunger of those impacted by the Hollowing. As a result, humanity slowly began to return to normal, albeit with lasting fear and distrust for the people they'd pejoratively dubbed ghouls. Zoey, Celeste, Valeria, and Jasmine
