

I'm not robot

I am not robot!

Instead of adding weight and volume to the issue, the Codes target the source of the problem, greatly benefiting the patient. Each MD Code includes information regarding the target depth of injection, the proper delivery tool (needle or cannula) and delivery technique (e.g., aliquot, bolus, fanning), and the minimum product volume recommended to achieve visible, subtle, natural looking results brought to Australia by Dr. Mauricio de Maio (Key opinion leader). Unlike traditional methods where the problem area was treated directly, the MD Codes™, including the Point Lift which had been previously introduced, take on a holistic approach to injecting. It takes into account the face as a whole during treatment. The MD Codes™ is a scientific, specialised approach to using dermal filler to achieve subtle, natural looking results brought to Australia by Dr. Mauricio de Maio (Key opinion leader). At Evergreen MD, our expert medical professionals use the MD Codes™ philosophy as the foundation of our treatment plans, combined with our own techniques. Con la versatilidad de la nueva generación de rellenos dérmicos de ácido hialurónico —la Gama VYCROSS® de Allergan—, ahora disponemos de la llave para abrir el código de la revitalización facial. The MD Codes™ system was developed to increase clinician success rates by reducing variability in the technical aspects of hyaluronic acid (HA) filler treatment and focusing on addressing unfavorable emotional attributes of the face. Los MD CODES o Códigos Medicos, son un sistema de mapeo y tratamiento facial desarrollado por el Dr. brasileño Mauricio Maio. Estos códigos son una serie de puntos anatómicos estratégicos en el rostro, que se usan para guiar y planificar procedimientos de rejuvenecimiento facial con rellenos dérmicos como Acido Hialuronico y/o Toxina Botulínica. The MD Codes provide a universal symbolic language for reducing variability in injection technique and the platform provides user-friendly algorithms to help clinicians increase patient satisfaction by going beyond treatment of lines and folds and to focus on reducing unfavorable facial attributes. The MD Codes™ is a system that was developed to increase patient confidence, safety and clinician success rates with injectable treatments and by focusing on addressing unfavourable emotional attributes of the face. The MD Codes™ system was developed to increase clinician success rates by reducing variability in the technical aspects of hyaluronic acid (HA) filler treatment and focusing on MD Codes are very precise guidelines to follow when injecting hyaluronic acid from the Allergan-Juvederm range. Explore the MD Codes Booklet (Free download as PDF File.pdf), Text File.txt) or read online for free MD Codes help patients look and feel their very best by combining the incredible benefits of the Allergan product range, which includes: Juvederm. JUVEDERM filler works to improve facial wrinkles and folds. METHODS: The MD Codes, or medical codes, represent specific anatomical subunits for injection of HA fillers.
