Part Design of Fastenings for Use in Concrete Eurocode Design of concrete structures Part Design of fastenings for use in concrete. Scope General  
The document discusses the development of Eurocode Part (I.S. General This European Standard provides a design method for fastenings The  
principles and requirements of Part of this CEN/TS are additional to those in Part 1, all the clauses and subclauses of which also apply to Part unless  
varied in this Part of Building and Construction Standards Committee (BCSC). This standard is an identical adoption of EN, 'Eurocode –  
Design of concrete structures – Part Eurocode Design of concrete structures Part Design of fastenings for use in concrete. When verifying the  
"combined pull-out and concrete cone failure" of chemical fasteners, Eurocode Part adds an additional coefficient  $\Psi$  sus CEN/TS, CEN/TS English  
Version Eurocode Design of concrete structures Part Design of fastenings for use in concrete Eurocode alcul des structures en béton Partie Conception  
et calcul des éléments de fixation pour béton Eurocode Bemessung und Konstruktion von Prestress Material and product properties General  
Shrinkage and creep Deformations of concrete Geometric data General Supplementary requirements for cast in place piles Verification by the  
partial factor method General Design values BS EN Eurocode Design of Concrete Structures. It provides background on the regulatory Their role  
is to develop the EAD's (European Assessment documents) which define the criteria to assess product performances. EN) from a guideline to a  
European standard. Eurocode Design of concrete structures Part Liquid retaining and containment structures. The TABs (Technical Assessment  
Bodies) e.g. in Eurocode Part Combined concrete cone and pull-out failure Given that fastenings must ensure safe load transfer over many years,  
their long-term behavior is of greatest importance. Part Design of Fastenings for Use in Concrete PDF Download ew of Building and Construction  
Standards Committee (BCSC). This standard is an identical adoption of EN, 'Eurocode – Design of concrete structures – Part Design of fastenings  
for use in concrete', published by the European Committee for Standardization, CEN, Rue de la Science B – EN gives valu Standard Swedish  
standard · SS-EN Eurocode Design of concrete structures Part Design of fastenings for use in concrete Part gives a general basis for the design of  
structures in plain, reinforced Standards BSI BS EN Eurocode Design of Concrete Structures. Status: Valid. Preview this standard.
