

I'm not robot

I am not robot!

You can enter an optional description for your file into the "Description" field. I have tried this code, but it has some problems. Here's how you can get started with our demo: Firstly, select the most appropriate document layout from our library. Create your own PDF widget. Enter a title into the "Title" field. Receive an individual code to display the widget. Can anyone help me with this? Click After you have set your plugin, you will acquire your personal code from the appeared window on Elfsight Apps Click the "Files" link, click the "Upload Files" link, and then click the "Choose File" button to select your PDF. Enter an optional title for your file in the designated text field, then click 7, · I have to upload file in a application using the FileUpload control. Upload your PDF file or link to it directly in the app. Copy the generated code snippet and paste it into your site Get Media ID. To complete some of the following API calls, you need to have a media ID. There are two ways to get this ID: From the API call: Once you have successfully uploaded media files to the API, the media ID is included in the response to your call.; From hooks: When a business account receives a media message, it downloads the To activate the widget, take the following steps. Customize the viewer settings in order to ensure the best user experience. StepPaste the public link for your PDF file into the field under "Add a Link." A preview of your file appears above. I have tried this code, but it has some problems. Using our free configurator, generate a plugin with a preferable design and add files.
