Dalmec zero gravity balancers Manual Industrial Manipulators Pneumatic Manipulator PARTNER EQUO with articulated arms PARTNER EQUO equipped with special gripping tools, is particularly suitable to Industrial Manipulators Dalmec offer a wide range of manipulators, fitted with custom-built tooling for the "weightless" handling of various mechanical pneumatic tooling for the Industrial Manipulators Manipulator with pneumatic jaws for picking multiple coils, with WIRE manual rotation of°. We are able to lift every kind of product weighing from up to kilograms using compressed-air only. Dalmec is the response to the need to handle loads of different types in enslavement to transport lines, packaging equipment, production DALMEC Industrial Manipulators with double cable, equipped with simple gripping tools, allow the handling of light loads in a weightless condition, throughout the working area. Manipulator equipped with a tooling made up of four adjustable gripping heads pneumatically operated for the gripping of exhaust manifolds. Manipulator with pneumatic gripping tool for picking and° pneumatic inclination of cylinders. DALMEC MECHANICAL PARTS dalmec Industrial Manipulators Dalmec DALMEC Industrial Manipulators and Material Handling Manual lifts for the ergonomic handling of loads in weightless condition. Manipulator with expanding mandrel for picking coils via the core. The manipulator and the gripping equipments are built for cleanliness in the pharmaceutical, food and chemical industries, as well as in other sterile structure is realized using AISI stainless steel with a few parts in AISI / Dalmec can manufacture the Posifil completely in stainless steel. Manipulator designed to pick on the coil's flange with pneumatically actuated tooth, with manual inclination of the coil from the vertical axis to° Stainless steel version. Examples of manipulators and applications for gripping and handling common products Dalmec S.p.A The data and dimensions are to be considered approximate and not fixed, Dalmec lars the right to perform changes without notice Partner column mounted PEC Noholes øPartner overhead mounted PEF Compressed air attachment point Hole to be made on the support Holes for fastening screws Support to be mounted by the customer Industrial Manipulators MI M MIS type Micropartner Manipulator, overhead trolley mounted, used for the handling of parts of boilers. Manipulator with gripper tooling for picking and tipping casting cores. DALMEC Dalmec Dalmec can supply explosion-proof versions in conformity with the ATEX Directive, suitable for the installation of the manipulator in explosion-risk environments classified as zone core of the PMC type Partner manipulator, column design, provided with gripper tooling for picking and unwinding reels of plastic film from a cutting pneumatically assisted rotation through an angle of°, the individual reels are then positioned vertically on. The gripping tool is connected to the balancing group by two independent steel cables to guarantee max safety Dalmec zero gravity balancers Dalmec manipulators DALMEC Industrial Manipulators and Material Handling Manual lifts for the ergonomic handling of loads in weightless condition. Manipulator with expanding mandrel for picking coils via Partner manipulator, column mounted version, equipped with tooling for handling cast-iron covers. the lator with adjustable forks type tooling for handling DALMEC Industrial Manipulators allow the ergonomic, safe and effective handling of any product. Manipulator with pneumatic gripper for taking and rotating transmission Industrial Manipulators Manipulator with pneumatic jaws for picking multiple coils, with WIRE manual rotation of°.
