Child Behavior Checklist for Ages 6-18 ©. The version of the CBCL for ages 6-18 (CBCL/6-18) is the parent/caregiver rating form of the ASEBA system, designed to measure a broad range of behavioral and emotional problems in children and adolescents aged 6-18. These forms include versions of the Child Behavior Checklist (CBCL), completed by parent figures for 1½ to year-olds and for 2 to year-olds; the Caregiver-Teacher Report Form (CTRF), completed by caregivers and teachers for 3 to 5 year-olds; and the Youth Self-Report (YSR), completed by children and adolescents aged 11-18. The CBCL is completed by parents. Completed by parents/care providers of children ages 6-18, during the first and last EBP treatment sessions, and every 3 months for EBPs exceeding 6 months, for the following practices: Caring for Our Families (CFOF) for treatment cycles started before 1/1/2000; Loving Connections (LC) for treatment cycles started after 1/1/2000. The Child Behavior Checklist (CBCL; Achenbach & Rescorla, 2001), a component of the Achenbach System of Empirically Based Assessment (ASEBA), is a revision of the CBCL/4-18 (Achenbach, 1991). For each item that describes your child now or within the past 6 months, please circle the item if it is very true or often true of your child. The revision of the CBCL, the CBCL/6-18 (used with children 6-18), is made up of eight syndrome scales: anxious/depressed • The Child Behavior Checklist (CBCL) provides a standardized approach to scoring and interpreting behavioral and emotional problems in children and adolescents aged 6-18. Revisions included norming the instrument on children from 6-18 years of age, rather than from 4-18 years of age; adding six items to replace items that were rarely endorsed or were weak. Created Date: 7/7/2000 PM Child Behavior Checklist for Ages 6-18 ©. Completed by parents/care providers of children ages 6-18, during the first and last EBP treatment sessions, and every 3 months for EBPs exceeding 6 months, for the following practices: Caring for Our Families (CFOF) for treatment cycles started before 1/1/2000; Loving Connections (LC) for treatment cycles started after 1/1/2000. The Child Behaviour Checklist (CBCL/6-18) is a parent report measure designed to assess behavioural and emotional problems in children and young people aged 6-18. The CBCL/6-18 produces an Internalizing Problems score—formed by combining Anxious/Depressed, Withdrawn/Depressed, and Somatic Complaints—and an Externalizing Problems score—formed by combining Conduct Problems and Externalizing. Created Date: 7/7/2000 PM The CBCL is a standardized form that parents fill out to describe their children's behavioral and emotional problems. The CBCL consists of approximately 250 items, each rated on a three-point scale (0 = not true, 1 = somewhat or sometimes true, 2 = very true or often true). The other two components are the Teacher's Report Form (TRF) (completed by teachers), and the Youth Self-Report (YSR) (completed by the child or adolescent himself or herself). The scores are calculated based on the following items: Bowel movements outside toilet; Bragging, boasting; Can't concentrate, can't pay attention for long; Can't get his/her mind off certain thoughts; obsessions (describe); Can't sit still, restless, or hyperactive; Clings to adults or too dependent; Complains of loneliness. CBCL Quick Guide. Circle the item if it is somewhat or often true of your child. CBCL Quick Guide.
