Beat features a fourth (1/2 steps), which is Zappa's favorite interval. Name. Date Hits. Measure Not any more or less irregular than the first. Rating You'll see it many times through the rest of this piece.

Here's a quickie recording of one of the stranger bass pieces I've learned. There are two more fourths in this measure (C-G, E-A). The first measure opens with a B (although this piece is slightly atonal) and features some unusual intervals. I don't think I would have passed an audition for Frank with this performance, but it's a fourth (1/2 steps), which is Zappa's favorite interval. Measure Not any more or less irregular than the first. Rating You'll see it many times through the rest of this piece.
