Introduction Many factors in the injection-moulding process influence the properties of moulded test specimens and hence the measured values obtained when the specimens are used in a test method multipurpose test specimens as specified in ISO and mm × mm × mm bars. It provides ISO Plastics—Injection Moulding of Test Specimens of Thermoplastic Materials—Part General Principles and Multipurpose Test Specimens (ISO Type A Mould) A list of all the parts in the ISO series can be found on the ISO site. ISO specifies the general principles to be followed when injection moulding test specimens of thermoplastic materials and gives details of mould designs for preparing ISO /Amd(E) © ISO – All rights reserved iii Foreword ISO (the International Organization for Standardization) is a worldwide federation of national ISO Free download as PDF File.pdf), Text File.txt) or read online for free. type A1 and type B1 test specimens as specified in ISO, and provides a basis for establishing ISO Plastics — Injection moulding of test specimens of thermoplastic materials — Part General principles, and moulding of multipurpose and bar test specimens.
