

I'm not robot

**I am not robot!**

Linguistics, Sociology. It examines how and why languages change within society This work presents short chaotic sequences with good auto correlation properties. This introductory textbook provides a penetrating answer to this question, explaining basic sociolinguistic concepts through a wide range of examples, and by drawing on Amra I. Sultan. The studied sequences are synthesized by means of the logistic map function, and being chaotic but fully deterministic, become a good alternative to well-known sequences, for example the Zadoff-Chu sequences, especially for small size sequences commonly used for frame synchronization purposes in digital An introduction to sociolinguistics. This text explains basic sociolinguistics concepts through a wide range of examples and by drawing on classic approaches to the subject as well as from the most recent research. It examines how and why languages change within society This text explains basic sociolinguistics concepts through a wide range of examples and by drawing on classic approaches to the subject as well as from the most recent research. Journal of Tikrit University for Humanities Sociolinguistic competence (henceforth SC) refers to the understanding, or organization of the principles of language use that are determined by the features of the specific language use context. The studied sequences are synthesized by means of the logistic map function, and being chaotic but fully deterministic, become a good alternative to well-known sequences, for example the Zadoff-Chu sequences, especially for small size sequences commonly used for frame synchronization purposes in digital An introduction to sociolinguistics.
