Concepts of community health nursing – Community nursing process. Objectives, scope and principles of community health nurses as community health officer (CHO) in Health & Wellness centres, as envisaged by GoI are integrated into Community Health Nursing course. Community Health Nursing For BSc and PB BSc Nursing Students, Volumes (With Free Community Health Nursing Practice Workbook for BSc and PB BSc Nursing Students) Community health Nursing is the synthesis of nursing and public health practice applied to promote and protect the health of population. In the final year, you will get to learn in-depth about Community Health Nursing or we can say the second part of it. The duration of I have a great pleasure in presenting the book Community Health Nursing to nursing community. This community health nursing notes/book contain This book will continue to add nursing students of all levels and nurses for their growing understanding of Community Health Nursing. I conceived the idea of writing this book due to lack of nursing books, written by Indian authors in the context of Indian situation. It covers almost all the chapters as per the latest syllabus of Indian Community Health Nursing Notes/Book, P.C. or P.B. BSC Second Nursing Students based on INC and RGUHS. Additionally, Maternal Nursing & Management of Nursing Services is also on the syllabus of BSc 4th year Community health Nursing is the synthesis of nursing and public health practice applied to promote and protect the health of population. Last but not least, the final year of BSc Nursing is quite the same as the 3rd year. Also they need to think critically and be It covers definitions of community health nursing, national health policies and programs in India, organization of rural and urban health services, approaches and roles of Introduction to community health nursing. To meet the demands of a constantly BSc 4th Year Nursing Books. It combines all the basic This extraordinary textbook contains all the aspects of community health nursing comprehensively. Community health nursing is essential particularly at this point Section Concepts of community, health and nursing Section Determinants of health Section Concepts of epidemiology Section Communicable diseases Section Non-communicable diseases Section Demography Section Concepts of community health and community health nursing Section Health planning, policies and problems Section Delivery of community health services Section Now we are witnessing so much changes taking place in health care system. It combines all the basic elements of professional, clinical nursing with public health and community practice.
