The sample Conholdate PDF to JAVA Conversion is cross platform and cross browser conversion app that allow you to convert PDF to JAVA in any modern browser (Chrome, Safari, I am looking for a way to convert an HTML file to PDF using a Java library that is preferably free. generationOfPDFFromImage iText and PdfBox are both Java libraries that we use for the creation and manipulation of pdf files. As per their site, JODConverter, the Java OpenDocument Converter, sion for Java also provides the WordProcessingFileType class if you need to specify another Word file format as a target for your conversion. In the below program, the following methods are handled. This project allows creation of new PDF documents, manipulation of existing documents and the ability to extract content from documents. Although the final output of the libraries is the same, they operate in a different manner. Let's take a closer look at each of them

```
InputStream doc = new FileInputStream(new File(docPath)); XWPFDocument document = new XWPFDocument(doc); PdfOptions options = (); OutputStream out = new FileOutputStream(new File(pdfPath)); tance().convert(document, out, options); n("Done"); } catch (FileNotFoundException ex) {
```

Learn how to convert HTML to PDF in Java using OpenPDF and Flying Saucer or using the Open HTML to PDF library, with a little help from Jsoup Latest version can be found here.
