**I am not robot!**

Download Datasheet The SpyGlass product family is the industry standard for early design analysis with the most in-depth analysis at the RTL design phase. The VC SpyGlass™ linting solution integrates industry-standard best practices with Synopsys' extensive experience working with industry-leaders. Unsynchronized Information on how to invoke the vc\_static\_shell, GUI and usage of common commands across the platform is described in the VC Static Platform User Guide. For ease of access, a few commands are listed here Learn how to use Spyglass, a versatile navigation app with compass, maps, GPS, rangefinder, sextant and more. Spyglass lint user guide Your learning platform uses cookies to optimize performance, preferences, usage & statistics. SpyGlass provides an integrated solution for analysis, debug and fixing with a comprehensive set of capabilities for structural and electrical issues all tied to the RTL description of design. Infrastructure for rule selection and customization aligned with design milestones This user guide focuses on the basic operations of the VC SpyGlass Lint application only. Information on how to invoke the vc\_static\_shell, GUI and usage of common commands Learn how to use Spyglass, a versatile navigation app with compass, maps, GPS, rangefinder, sextant and more. GuideWare™ methodology documentation and rule-sets included. SpyGlass provides an integrated solution for analysis, debug and fixing with a comprehensive set of capabilities for structural and electrical issues all tied to the RTL description of design SpyGlass Console User Guide SpyGlass Console Reference Guide GuideWareEarly AdopterTurbo Lint Structural Product Documentation Area Audits Auto Verify CDC Advanced Methodology.
