Dynamics Project Operations delivers a business solution complete with project accounting capabilities at every project phase. Customer-focused projects can be set up on a time and materials or fixed-price basis. A project is a group of activities that is designed to provide a service, produce a product, or achieve a result. The project team records time, expenses, and other transactions that are associated with the project, and the project accountant ensures that these transactions are recorded correctly. Use Project management and accounting to plan, create, manage, control and complete projects for your organization. Customer-focused projects can be set up on a time and materials or fixed-price basis.
