By John Gross Saxophone Book Item: ADV \$ Add to Cart Add to List. Daniel Kientzy: Les sons multiples aux saxophones Written in, Christopher Bochmann's Essay XIII for solo Eb alto saxophone requires the performer to choose the alternate fingerings or Timbre Shifts used at several moments of the piece, as well as for the multiple choice multiphonics proposed by the composer This work presents a study of the multiphonics of the saxophone from the points of view of timbral analysis and musical performance. These are mostly useful as a strange sounding effect rather than to play conventional harmonies or chord tones High F#: Finger the standard auxiliary front F key (first finger of left hand on the aux F and 2nd finger on the C key)add side Bb High G: (No multiphonic) Finger the auxiliary front F key (first finger of left hand) without holding down the C key, add side Bb and right hand F finger. Multiphonics for the Saxophone. Daniel Kientzy: Les sons multiples aux saxophones Multiphonics (sung) Growling, or singing into the instrument while playing, is a recognised substitute for fluttertonguing, but is also quite characteristic of certain kinds of raucous This work presents a study of the multiphonics of the saxophone from the points of view of timbral analysis and musical performance. It is a text that is of equal importance to A comparative study of saxophone multiphonics from the musical, perceptual and acoustical points of view and proposes four major classes based on the analysis of the Multiphonics (Playing more than one note at once) It is not possible to play a complete set of chords on the saxophone, but there are a few fingerings that you can use to play what we call "multiphonics," more than one note at once.
