Leica Biosystems continues to advance cancer diagnostics with the NEW BOND-MAX. With class-leading speed for all routine IHC and ISH tasks, including the ability to stain more slides in less time, Bond-III provides critically important advantages that benefit histologists, managers and pathologists. Enhance your IHC and ISH productivity with usability and menu improvements driven by the experience of leading laboratories. With BOND-MAX, every detection kit is a premium product. Maximize your lab space with this compact solution that combines BOND RXm Advancing Cancer Diagnostics Improving Lives BOND RXm COMPACT, FULLY AUTOMATED IHC AND ISH FOR RESEARCH USE ONLY. Easy upkeep.» Check bulk fluids at a glance. NOT FOR USE IN The only detection chemistry you'll need. Easy to use, quick to learn» An intuitive instrument means new operators are up and running quickly BOND-MAX Fully Automated IHC and ISH. NEW levels of staining excellence. Leica Biosystems BOND-MAX Fully Automated IHC and ISH. NEW levels of staining excellence. Enhance your IHC and ISH productivity with usability and menu improvements driven by the experience of leading laboratories Bond-III TM. SPEED really matters. Leica Biosystems continues to advance cancer diagnostics with the NEW BOND-MAX With class-leading speed for all routine IHC and ISH tasks, including the ability to stain more slides in less time, Bond-III provides critically important advantages that benefit Leica BOND instruments are gentle on the tissue and ensure total tissue care with exceptionally low dispense and waste volumes. Continuous processing Leica BOND using an automated BOND system (includes Leica BOND-MAX system and Leica BOND-III system). The BOND Compact Polymer Detection system is available with either DAB or Red chromogens or as an efficient Parallel Double staining DAB/RED kit Leica Biosystems Small footprint» BOND-MAX fits into the tightest space. Already a proven performer, the new BOND-MAX provides even faster setup, an exciting ready-to-use reagent range and powerful new connectivity options BOND-III processes protocol steps simultaneously The BOND-III stainer provides you with all the pieces to solve the diagnostic puzzle quickly and consistently. Keep cases organized with visual management. The clinical interpretation of any staining or its absence should be BOND-III helps create high performance teams as its optimized user experience makes common tasks fast and efficient.
