Note: There are 2 correct answers to this question.

- A. Assertion
- B. Proxy
- C. Error
- D. Consent

Answer: B, C

Federation

Question: 7

How can you get the public certificate that is required to validate a JSON Web Token?

- A. By downloading the certificate from the SAP Customer Data Cloud console
- B. By calling the endpoint `accounts.getJWTPublicCertificate`
- C. By requesting the certificate from the SAP Customer Data Cloud support team
- D. By calling the endpoint `accounts.getJWTPublicKey`

Answer: B

Topic: 2

Extensibility and Dataflows

Question: 8

You are setting up a new webhooks endpoint and you would like to retrieve the profile object on receipt of the "Account logged in" notification. What method would you recommend?

- A. `accounts.getAccountInfo` with UID from notification
- B. Use the profile object sent in the notification payload.
- C. `accounts.search` with `'SELECT profile FROM emailAccounts WHERE profile.email = $email from notification$'`
- D. `accounts.search` with `'SELECT profile FROM account WHERE profile.email = $email from notification$'`

Answer: A

Extensibility and Dataflows

Question: 9

Which events can be configured in the Console for webhooks?

Note: There are 3 correct answers to this question.

- A. Account registered
- B. Consent granted
- C. Account deleted
- D. Account verified
- E. Subscription updated

Answer: A, B, C

Extensibility and Dataflows

Question: 10

You are building a dataflow to transfer existing users' subscriptions from the marketing system to SAP Customer Data Cloud. The marketing system will provide a PGP-encrypted file and place it in an S3 bucket. All records that fail to update will be zipped and sent back to the S3 bucket.

Which actions will you perform during the creation of the dataflow?

Note: There are 2 correct answers to this question.

- A. Add a file.decrypt.pgp component and a file.compress.zip component.
- B. Add an error handling step after a datasource.read.amazon.s3 component.
- C. Add an error handling step after a datasource.write.gigya.account component.
- D. Add a file.encrypt.pgp component and a file.uncompress.zip component.

Answer: A, C
