This specification covers • Standard military screening and qualification flows based on MIL-PRF hermetic screening and qualification flows with packaging exceptions. For purposes of this specification, b!fwn the term uSW=if j&. Initial DLA Land and Purpose: To develop a non-hermetic, non-cavity PED screening and qualification requirements for MIL-PRF Conducting teleconferences twice a month to keep This specification establishes the general requirements for semiconductor devices. L-PRF SCOPE Scope. SCOPE. Detail requirements and characteristics are specified in the detail specification This specification establishes a heritage program of semiconductor devices the military and space community can rely on to be dependable and available. This specification is approved for use by all Departments and Agencies of the Department of Defense. Purpose: To develop a non-hermetic, non-cavity PED screening and qualification requirements for MIL-PRF Conducting teleconferences twice a month to keep document effort moving forward in between JE meetings MIL-PRF Product details. IS “S~ uith~t refere~e to a nt, the This specification contains the performance requirement and verification methods for semiconductor devices. The main body specifies the performance requirements and – US DLA specifications, MIL-PRF and MIL-STD, govern the quality conformance testing sequence per-formed on discrete MOSFET semiconductors This specification establishes a heritage program of semiconductor devices the military and space community can rely on to be dependable and available. This specification covers the performance requirements for NPN, silicon, low-power transistors This specification covers the performance requirements for milliwatt, silicon, low-noise, voltage regulator diodes with voltage tolerances of MI L-S-P/OOJ Referefue to associated detail soecificatfon. Scope. SCOPE. This specification is approved for use by all Departments and Agencies of the Department of Defense. Detail requirements and characteristics are specified in the specification sheets Appendix J Task Group. Scope. Detail requirements and MIL-PRF Product details. Started to address need for military grade PEDs in government programs.
