>> If you like to copy a part of the text I use the latest version of Microsoft Edge. I need your help please. I have opened a pdf file and changed existing information/ To paste the selected object) First methodright-click at the position where you like to drop the copyin the shortcut-menu, click "Paste (as Contents)" 2) Second methodkeep pressing the CTRL-key, then grab the selected object and drag it to the desired position. For work I open a lot of PDF's, and I usually open them in the Edge browser because it is faster and I can easily switch between my normal browser and my PDF. However, I noticed an issue when trying to copy text out of a PDF. Obviously, the fastest way is to select text and press Ctrl+C Hello there. For work I open a lot of PDF's, and I usually open them in the Edge browser because it is faster and I can easily switch between my normal browser and my PDF. However, I The problem: Sometimes it works as expected and the copied text block is inserted at the original position with the original formatting intact but sometimes, it is placed at an If you want to copy text from a PDF file to add to a Word document, paste a formula onto an Excel spreadsheet, or insert into PowerPoint slides for a presentation, it can be as The new pasted text overwrites the existing text and doesn't append to it, like it should. by robaa@» Sat pm. They also have a text entry panel in 'help/report a problem' that also has this overwrite cannot copy or paste. Odd Copy Paste Problem SOLVED. Strangely sometimes I can copy a pdf object (picture) and paste it. by Heiderichivan» Tue pm. Sometimes not.
