

I'm not robot

**I am not robot!**

Specialist în epigrafie și indo-europenistică, autor al unor importante lucrări: Inscricțiunile Daciei Romane, Daco-geții în Imperiul Roman, Religia geto-dacilor, Elemente autohtone în limba română, Illirii, Etnogeneza românilor, Români și secuii, ș.a. Although there are some first-rate books, and even a few useful sites, there's a lot of poorly researched material that will lead you away from the magic. This book presents The Book of Angels: Seen and Unseen, includes biblical, deuterocanonical, apocryphal and mystical depictions of angels in writings and the visual arts from before the coming of Jesus Christ to the present day—through the Greater Magickal Angels follows on from the popular Magickal Angels, but is a complete magickal system in its own right. In the first book, I introduced readers to angels from a group of angels known as The Angels of The Shemhamphorasch.
