Published date Publisher Standards Australia1 IEC Periodic tests described in ANSI/ASA S/Part/ IEC apply to sound level meters for which the model has been, or has not been, pattern approved by an independent testing organization responsible for pattern approvals in accordance with the test procedures of ANSI/ASA S/Part/ IEC level meter according to Partand Partof IEC and are not concerned with the sound level meter in use. Information on assessment of conformance is given in Annex C of IEC, but, as an example, suppose for a particular parameter the acceptance limits around the design goal are +, dB and the maximum permitted uncertainty of S - SOUND LEVEL METERS - PartPeriodic testsFOREWORDThe International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all. Buy DIN EN Buy AS IEC ElectroacousticsSound level meters Specifications from Intertek Inform IEC describes procedures for periodic testing of time-weighting, integrating-averaging, and integrating sound level meters that were designed to conform to the IEC ElectroacousticsSound level metersPartPeriodic tests. Information on assessment of conformance is given in Annex C of IEC, but, as an example, suppose for a particular parameter the acceptance limits around the design goal are +, dB and the maximum permitted uncertainty of S - SOUND LEVEL METERS - PartPeriodic testsFOREWORDThe International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all. Describes procedures for periodic testing of conventional, integrating-averaging, and integrating IEC gives electroacoustical performance specifications for three kinds of sound measuring instrumentstime-weighting sound level meters that measure Periodic tests described in this part of IEC apply to sound level meters for which the model has been, or has not been, pattern approved by an independent testing, · PDF€ Language. The object of IEC is to promote international co-operation on all questions con The IEC -1 standard states that the acceptance limits for ay rates of the F setting are – dB/s and + dB/s. national electrotechnical committees (IEC National Committees). In other words, a ay rate ranging from – dB/s is acceptable (i.e., the design goal of minus dB/s or the design goal of plus dB/s, respectively) Language in which youIEC describes procedures for periodic testing of time-weighting, integrating-averaging, and Buy DIN EN ELECTROACOUSTICSSOUND LEVEL METERSPARTPERIODIC TESTS (IEC) from Intertek Inform. The object of IEC is to promote international co-operation on all questions con The IEC -1 standard states that the acceptance limits for av rates of the F setting are -dB/s and +dB/s. In other words, a vrate ranging from -dB/sdB/s is acceptable (i.e., the design goal of minus dB/s or the design goal of plus dB/s, respectively) 1 IEC Periodic tests described in ANSI/ASA S/Part/ IEC apply to sound level meters for which the model has been, or has not been, pattern approved by an independent testing organization responsible for pattern approvals in accordance with the test procedures of ANSI/ASA S/Part/ IEC level meter according to Partand Partof IEC and are not concerned with the sound level meter in use. national electrotechnical committees (IEC National Committees).
