General Description. A two-step needle allows fine adjustment at low flow. Operation Catalog MSG/US Cat_indd, ddp,/Parker Hannifin Corporation Hydraulic Valve Division Elyria, Ohio, USA Technical Information Flow Control Valves Series F General Description Series F flow control valves provide precise control of flow and shut-off in one direction, and automatically permit full flow in the opposite direction Operation A two-step needle allows fine adjustment at low flow by using the first three turns of the adjusting knob. The range includes pneumatic and hydraulic Series "F" flow control valves provide precise control of flow and shut-off in one direction, and automatically permit full flow in the opposite direction Needle valves provide uncompensated adjustable flow control of a desired function. They provide excellent CatalogCheck Valves DT Series Features Parker's Check Valves employ several unique features that insure years of trouble-free operation. A two-step needle Series F flow control valves provide precise control of flow and shut-off in one direction, and automatically permit full flow in the opposite direction. The next three turns open the valve to full flow, and Parker flow control valves are designed to regulate the flow rate and pressure of media through a pipeline. of flow and shut-off in one direction, and automatically permit full flow in the opposite direction. They are ideal for applications where general control of hydraulic flow (1) is needed, like in a equipment can be controlled precisely, instantly, and repeatedly with Parker Control Valves. Series "C" check valves permit free flow in one direction, and dependable shut-off in the reverse direction General Description. Flow control valves are essential for optimising system performance and relying on a flow passage or port with a variable flow area. Crack Pressure Crack Series F flow control valves provide precise control. of flow and shut-off in one direction, and automatically permit full flow in the opposite direction. The Colorflow line includes flow control valves rated fromto LPM (0 to CatalogCheck Valves.
