Seamless, round copper tubes for medical gases or vacuum. Copper and copper alloys — Seamless, round copper tubes for medical gases or vacuum. Inform now! Seamless, round copper tubes for medical gases or vacuum (British Standard) EN copper tube is specified throughout Europe, the Middle East and Asia and is the only copper tube specified in the Health Technical Memorandum and ISO. The internal cleanliness of medical gas and oxygen tubes is critical to prevent gas contamination and to preserve the safety of the installation all the way to the patient. Copper tube EN Typical Available Dimensions. Dimensions of seamless round copper and copper alloys tubes for medical gases or vacuum. This document supersedes EN and EN /A. This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of the EU Pressure Equipment Directive (PED)/2007/EC. It is suitable for jointing degreased medical gas copper fittings and other medical gas equipment compliant to EN (seamless copper tubes for medical gases and vacuum), EN, ISO, HTM and HTM BS EN copper tube is specified throughout Europe, Asia and the Middle East and is the only copper tube specified in the Health Technical Memorandum and ISO which dictate the current best practice for the installation of pipelines for compressed medical gas and vacuum systems. In comparison with EN, the following significant technical changes were made: a) The size range of the outside diameters has been increased from mm to mm; b) Nominal outside diameters have been added to Table 1; EN Degreased Medical Copper Tube Description Precision UK Degreased Copper Tube, Tube e® is suitable for jointing Degreased Medical Gas Copper Fittings and other Medical Gas Equipment compliant to BS EN, BSEN, BS Part Table X, EN and HTM (HTM). This standard BS EN Copper and copper alloys. Copper tube EN Typical Available Dimensions. Dimensions of seamless round copper and copper alloys tubes for medical gases or g. pdf BS EN copper tube is specified throughout Europe, Asia and the Middle East and is the only copper tube specified in the Health Technical Memorandum and ISO. It is suitable for jointing degreased medical gas copper fittings and other medical gas equipment compliant to EN (seamless copper tubes for medical gases and EN Degreased Medical Copper Tube, Tube e® is suitable for jointing Degreased Medical Gas Copper Fittings and other. In comparison with EN, the following significant technical changes were made: a) The size range of the outside diameters has been increased from mm to mm; BS EN Copper and copper alloys. Seamless, round copper tubes for medical gases or vacuum is classified in these ICS categories Non-ferrous metal pipes. The European Standard EN, with the incorporation of amendment A, BS EN Copper and copper alloys.
