The Full Format test contains items and is appropriate for use. The BASC items endorsed by Sample's parent/guardian resulted in a clinically significant Hyperactivity scale score, a pattern that occurred in % of the standardization sample Executive Functioning Indexes. New to the BASC-3 TRS and PRS forms are the executive functioning indexes, which include the Problem-Solving Index, Attentional Control Index, and Measures. The BASC™ is a multimethod, multidimensional system used to evaluate the behavior and self-perceptions of children and young adults. The BASC-BESS can be used to indicate the level of behavioral and emotional functioning. It also provides information on the development, appropriate uses, validity, reliability, and interpretation of all components of the BASC (An electronic version of the manual). The BASC™ holds an exceptional track record for providing a complete picture of a child's behavior by applying a triangulation method for gathering information. Information about the administration, scoring, interpretation, and reliability and validity evidence related to the core BASC rating scales is presented. The BASC is widely used to assess a range of behavioral and emotional problems in youth. The BASC has parent, teacher, and self-report formats (TRS, PRS, and SRP). The BASC manual provides instructions for administering and scoring the TRS, PRS, and SRP; gives guidance in using the SDH and SOS; and includes all norm tables. Publisher address: Pearson, Bulverde Road, San Antonio, TX ; Telephone: ; FAX: ; E-mail View the BASC Intervention Guides Flyer, including descriptions, Tables of Contents, and Appendices for both the Intervention Guide and the Classroom Intervention Guide. Entering BASC Rating Scales Scores. At a school or class level, the BASC-BESS can identify improvement. Publisher: Pearson. Both the Short and Full Format tests can be administered to individuals and groups (e.g., kindergarten class).
