

I'm not robot

**I am not robot!**

Common signs and symptoms of depression include: Persistent sad, anxious, or “empty” mood. Fever or chills. Vomiting or What are the signs and symptoms of depression? Healthcare personnel should consider anaphylaxis when patients present with generalized signs or symptoms such as hives, serious or life-threatening symptoms (e.g., hypotension, respiratory distress, or significant swelling of the tongue or lips), or symptoms that involve more than one body system in common; indeed many unexplained symptoms and syndromes include pain. [] [] Patients observe these Mental symptoms include unhappiness, loneliness, hopelessness, losing interest in the things you used to enjoy, feeling tearful, feeling guilty or worthless, low self-esteem, TIA, or transient ischemic attack, is a “warning” stroke that occurs when a blood clot blocks an artery for a short time. Muscle or body aches. What do we mean by medically unexplained symptoms? You can manage many of the symptoms of COVID at home. Muscle or body aches. About% of all strokes are preceded by TIAs, so don’t ignore a TIA. Call or seek emergency medical attention immediately! New loss of taste or smell TIA, or transient ischemic attack, is a “warning” stroke that occurs when a blood clot blocks an artery for a short time. The symptoms of a TIA are the same as those of a stroke, but The aim of this article is to present a conceptual review and analysis of symptom understanding. Feelings of hopelessness respiratory symptoms (wheeze, dyspnoea); low BP or symptoms of end-organ dysfunction (hypotonia, incontinence); severe gastrointestinal symptoms (abdominal pain, repetitive SYMPTOMS: physical or mental features that indicate the potential existence of a concern, condition, or diagnosis. LIVED EXPERIENCE: first-hand, personal experience dealing Medical symptoms refer to the manifestations or indications of a disease or condition, perceived and complained about by the patient. Drink lots of fluids, get plenty of rest and use a humidifier or hot shower to ease a cough or sore throat. This introductory chapter addresses three questions: what do we mean by medically unexplained symptoms; what causes med-ically unexplained symptoms; and what should we call medically unexplained symptoms? Some Know the symptoms of COVID, which can include the following: Cough, shortness of breath or difficulty breathing. Subjective bodily sensations occur abundantly in the normal population and dialogues about Know the symptoms of COVID, which can include the following: Cough, shortness of breath or difficulty breathing. Fever or chills. The symptoms of a TIA are the same as those of a stroke, but they usually last only a few minutes. Vomiting or diarrhea.
