Micropiles are piles with a small diameter, typically less than 100 mm for bored piles and less than 200 mm for displacement piles. They are for drilled piles constructed using a drilling tool with a diameter less than 100 mm. Mikropfähle sind Kleinbohrverpresspfähle mit Durchmesser von weniger als 100 mm nach DIN EN, die ihre Last nahezu ausschließlich über Mantelreibung in das Erdreich übertragen. This standard specifies the general principles for the execution of works for micropile construction having a small diameter (for drilled micropiles, a shaft diameter smaller than 100 mm and for driven micropiles, a shaft diameter smaller than 200 mm). Die bauartspezifischen Normen sind Ausführungsnormen, welche die Ausführung, This standard establishes general principles for execution of piles which have a small diameter (smaller than 100 mm outside diameter for bored piles and smaller than 200 mm for driven micropiles, a shaft diameter smaller than 100 mm and for driven micropiles, a shaft diameter smaller than 200 mm) and which can be usually driven into the ground with small drilling or piling equipment. This document (EN) has been prepared by Technical Committee CEN/TC "Execution of special geotechnical works", the secretariat of which is held by AFNOR. The DIN EN standard is focused on the execution of special geotechnical work known as micropiles. Diese Norm legt die allgemeinen Grundlagen für die Ausführung der Arbeiten zur Herstellung von Pfählen fest, die einen kleinen Durchmesser haben (Außendurchmesser Norm [AKTUELL] DIN EN Berichtigung Ausführung von Arbeiten im Spezialtiefbau Mikropfähle; Deutsche Fassung EN, EN has been harmonized with EN. The general scope of CEN/TC is the standardization of the execution procedures for geotechnical works, including testing.
