The National Institute of Child Health and Human Development (NICHD) has initiated an ongoing effort to establish a core library of harmonized pediatric terms, beginning with a focus on neonatal and infant examination concepts as part of a broader terminology framework. We present the current state of terminology harmonization and describe a governance structure and mechanism for coordinating the development of a common pediatric research terminology that links to NICHD Terminology Files. To provide an overview of the roles and importance of terminologies in a range of pediatric clinical networks, and presents a model of coordinated terminology development and maintenance integrated with clinical terminologies to establish a Pediatric Terminology. Code C Core library of terms associated with pediatrics, representing information related to child health and development from pre-birth through years of age; contributed by the NCI Thesaurus. The Pediatric Terminology file contains the entire set of terms The National Institute of Child Health and Human Development (NICHD) has initiated an ongoing effort to establish a core library of harmonized pediatric terms, beginning with The Case for a Pediatric Terminology. The first tab in the spreadsheet is a set of links to all the Pediatrics Handbooks, manuals, etc, Pediatrics Handbooks Publisher Oxford ; New York: Oxford University Press Collection internetarchivebooks; inlibrary; printdisabled Contributor Internet Archive Language English Item Size Pediatric Rheumatology Terminology Subset Terminology developed by a collaborative effort of the National Cancer Institute's Enterprise Vocabulary Services, the National Institute of Child Health and Human Development, and an international group of clinicians and informaticists to support the reporting of events observed in clinical care and research in children and adolescents seen by experts mon terminology allows studies to build upon previous findings and to reuse data collection tools and data management processes. Part We present the current state of terminology harmonization and describe a governance structure and mechanism for coordinating the development of a common pediatric The Pediatric Terminology file contains the entire set of terms related to all projects within the Pediatric Terminology. Additionally, individual subset files are provided in the tabs of the spreadsheet. All files contain the same column headers, except for the set mapped to MedDRA. Chapter. George R. Kim and S.
