For segregated data and information that is not publicly releasable on the internet, access must be requested as depicted in the screen shot above. More. In some stanag interoperability of low-level ground-based air defence surveillance, command and control systems (part i) Published by NATO on ApAIM The aim of this STANAG is to define information exchange requirements for the interoperability of NATO Low-Level Ground-Based Air Defence Command, Control and Information Systems A Standardization Agreement (STANAG) is a NATO standardization document that specifies the agreement of member nations to implement a standard, in whole or in part, with or without reservation, in order to meet an interoperability requirement. NATO LibGuides are -based research guides that Ballistic failures are usually associated with areas of the armour where a weakness exists or has been introduced, e.g. unprotected welded joints in metallic plates and the influence of the welding process on material properties (heat affected zones). Important note The STANAG threat levels are shown in Table The velocity listed in the table is the expected velocity of the ammunition at the minimum range that it is expected to be encountered. The lower number threat levels are the least lethal, in terms of armor penetration ability, and increase as the threat levels numerically increase. These potentially vulnerable areas are termed structural weak areas (SWAs) Many of the STANAGs are agreements with little instructive information on how to implement the STANAG. Information is being regularly updated from the NATO Standardization Document Database (NSDD) Once access has been granted, view the STANAG list in Chapter to identify which STANAGs are important to the unit's mission. A STANAG is a NATO document that specifies the agreement of member countries to implement a standard. There are more than 1, STANAGs promulgated in NATO. Click the "Request Access" link and follow the prompts Buy STANAG SPECIFICATIONS FOR NAVAL MINE WARFARE INFORMATION AND FOR DATA TRANSFER from Intertek Inform Allied Publication. They do however refer to a detailed NATO publication. The Multimedia Library also holds an extensive collection of photo and video material.
