The mini-aqlq is widely used in both basic and applied research in the United States. Asthma Quality of Life Questionnaire (AQLQ) is a disease-specific health-related quality of life instrument that taps both physical and emotional impact of disease. The Asthma Quality of Life Questionnaire (AQLQ) is a 32-item questionnaire used to assess the physical, occupational, emotional, and social qualities of adults aged 17 to 70 years with asthma (Juniper et al., 1999). Validation of a standardized version of the Asthma Quality of Life Questionnaire\* (AQLQ-S) was conducted. High education and knowledge of self-management were associated with higher AQLQ-S scores. Mini-AQLQ scores did not change significantly between 2000 and 2005. Several risk factors were identified as risk factors for lower AQLQ-S scores. Each mini-AQLQ is written twice to differentiate between the highly scaffolded "enhanced version" and the less scaffolded "clean version." Alternative versions of AQLQ are: Standardized Asthma Quality of Life Questionnaire (AQLQ-S), Ferris, BA; and Derek R.

txt) or read online for free. Type of instrument: disease-specific questionnaire available in both interviewer and self-administered formats, designed for children aged 7 to 17 years of age. Download reference work entry pdf. Background: In the original 32-item Asthma Quality of Life Questionnaire (AQLQ), five activity questions are selected by patients themselves. AQLQ(S): Standardized Asthma Quality of Life Questionnaire; AQLQ + 12: for patients 12 years and older; Acute AQLQ: for acute severe asthma; the e-versions of this instrument are distributed by MAPI Research Trust. Asthma Quality of Life Questionnaire (AQLQ or AQLQ-J) developed by Juniper and colleagues is a 32-questions instrument to measure the functional problems that are most troublesome to adults (Fayers and Machin; Juniper et al.). Includes three individualized mini-AQLQ questionnaire pdf questions, in which the patient identifies activities which are limited because of asthma.

The mini Asthma Quality of Life Questionnaire (mini-AQLQ) is a disease-specific 15-item self-administered questionnaire that was developed and validated in a paper format. Juniper et al. (1999) validity (statistics) | Asthma. Abstract: The 32-item Asthma Quality of Life Questionnaire (AQLQ) has shown good responsiveness, reliability and construct validity; properties that are essential for respiratory/lung diseases. Obtaining the mini AQLQ.

Patients are asked to recall. Varisara Chantadol MD\*, Orapan Poachanukoon MD\*\* Department of Pediatrics, Faculty of Medicine, Thammasat University, Pathumthani, Thailand. Questionnaire data on mini-AQLQ was obtained in two cohorts of patients with asthma. The aim of this paper is to provide final quantitative validating data for the severe asthma questionnaire, developed using recommended qualitative and quantitative procedures for scale development, and can be used to gain insight into patients' perceptions of how severe asthma and its treatment affects their lives. #ERS Journals Ltd 1999. Development and validation of the mini Asthma Quality of Life Questionnaire. Asthma Quality of Life Questionnaire (AQLQ) | Standardized Asthma Quality of Life Questionnaire (AQLQ(S)) | Mini Asthma Quality of Life Questionnaire (mini AQLQ) | Asthma Quality of Life Questionnaire for 12 years and older (AQLQ + 12) | Acute Asthma Quality of Life Questionnaire (Acute AQLQ). Electronic (e) versions enable inclusion of asthma QoL in electronic medical records and research databases. Totally limited extremely limited. The 32-item Asthma Quality of Life Questionnaire (AQLQ) has shown good responsiveness, reliability and construct validity; properties that are essential for use in clinical trials, clinical practice and surveys. 8 The miniAQLQ measures functional impairments in 4 domains: symptoms, activity limitation, emotional

function and environmental stimuli. to measure the functional impairments that are most troublesome to adult patient with asthma, with a shorter version of the original aqlq, more suitable in large clinical trials and long-term monitoring. the mini asthma quality of life questionnaire ( miniaqlq) is a validated disease-specific quality of life ( qol) paper ( p) questionnaire. sonia buist, md; fred m. there are two instruments of the same name: asthma quality of life questionnaire mini aqlq questionnaire pdf ( marks) ( aqlq - m or aqlq - s or aqlq - sydney) is a 20- item self-administered questionnaire to measure quality of life in adults with asthma ( marks, dunn, & woolcock, 1992; spilker, 1996 ).

access the official mini asthma quality of life questionnaire ( miniaqlq) by juniper e, distributed by mapi research trust | eprovide, and up-to-date information on copyright, licensing, scoring, translations. pdf), text file ( . fl material and methods: questionnaire data on patient characteristics and the mini- asthma quality of life questionnaire ( mini- aqlq) scores from two separate cohorts of randomly selected swedish primary and secondary care asthma patients, in ( n = 1034) and ( n = 1126). asthma quality of life questionnaire with standardized activities aqlq ( s) please complete all questions by circling the number that best describes how you have been during the last 2 weeks as a result of your asthma how limited have you been during the last 2 weeks in these activities as a result of your asthma? mini- q lessons are shorter ( 3- 7 documents) but they also help students understand the process of close analysis, interrogation of documents, and argument writing. the mini asthma quality of life questionnaire ( mini- aqlq) is a short, standardized instrument that assesses asthma-related problems and functional impairments. 1992; spilker 1996). cox, phd; penelope j. the instrument should not be confused with the measure developed by marks gb and colleagues, which carries the same name.

mini version of the pediatric asthma quality of life questionnaire ( minipaqlq) : validity among thai asthmatic children.
